Un Secolo di storia e un futuro da illuminare
One century of history and a future to illuminate

La nostra storia comincia dal momento in cui l'arte del vetro entra nella nostra famiglia. Siamo agli inizi del 900' e Antonio Tammaro diventa un affermato Mastro vetraio a Napoli, creando , quelle che all'epoca, erano considerate opere d'arte.

Our story began when the art of glass entered our family. We were at the beginning of the 1900s and Antonio Tammaro became an established master glassmaker in Naples, creating what at the time were considered works of art.

Come tradizione insegna, l'arte passa di padre in figlio. Carmine, seguendo le orme del padre, continua con l'arte del vetro cristallo per tavolame, ma l'avvento dell'industrializzazione lo costringe a un cambio di rotta: lavorazione di vetro soffiato per illuminazione. Fonda così ,alla fine degli anni 50', la VE.CRI.N.

As tradition teaches, art skill passes from father to son. Carmine, following in his father's footsteps, continued with the art of crystal glass for tableware, but the advent of industrialization forces him to change course: starting the processing of blown glass for lighting. Thus, at the end of the 1950s, VE.CRI.N. was founded

Negli anni 80' nasce la vetreria Tammaro e figli. Il salto generazionale porta parte del processo produttivo alla meccanizzazione che,affiancata alla classica lavorazione del vetro, permette all'azienda di adeguare la produzione alla richiesta in tempi brevissimi (a differenza delle aziende completamente meccanizzate obbligate a produzione di massa dello stesso articolo).
Questa flessibilità permette di raggiungere clientele diversificate.

In the 80s "Vetreria Tammaro e Figli" glass factory was born. The generational leap brought part of the production process to mechanization, which, alongside the classic glass processing, allowed the company to adapt the production to the market demand in a very short time (unlike fully mechanized companies obliged to mass production of the same article). This flexibility of production did allow us to reach diversified customers.

Lo spettro della globalizzazione e il fulmineo sviluppo dei paesi extra europei instillano nella mente del giovane Franco , figlio di Carmine, l'idea di lanciare sul mercato il prodotto d'illuminazione assemblato. Nasce ,così, negli anni 90' la F.A.N. Europe lighting che , in breve tempo s'impone sul mercato proponendo articoli nei quali il vetro rimanga elemento primario.

The threat of globalization and the rapid development of extra-European countries instilled in the mind of young Franco, Carmine's son, the idea of launching the assembled lighting product on the market. Thus F.A.N. Europe Lighting was born in the 90s. In a short time, this new company imposed itself on the market by offering assembled light items in which glass remains a primary element.

Alla fine degli anni 90' , per mantenere alto il target di qualità e al contempo diversificare sempre di più la gamma dei prodotti, Franco fonda la L.V.F. , azienda che produce parti metalliche per illuminazione: alla lavorazione del vetro soffiato e centrifugato si aggiunge, con la nascita dell'azienda 2T, quella del vetro a lastra. La F.A.N. Mantiene il ruolo di assemblaggio, controllo qualità e lancio sul mercato del prodotto finito.

At the end of the 90s, to keep the quality target high and at the same time to diversify the range of products more and more, Franco founded L.V.F. , a company that manufactured metal parts for lighting. With the creation of the company 2T, production of bent glass was added to the processing of blown and centrifuged glass. In this way F.A.N. Maintained the role of assembly, quality control and launch of the finished product on the market.

Nel 2010 , periodo di crisi economica europea, i costi ormai diventati insostenibili per la gestione della produzione del vetro, unitamente a un carenza di materia prima nel paese e a un non ben delineato settore di ricerca e sviluppo delle tecnologie emergenti nel campo dell'illuminazione (LED), costringono Franco a spegnere definitivamente i forni.
Comincia così la collaborazione con aziende extraeuropee che possano realizzare sia prodotti altamente tecnologici che dal design ricercato, rispettando costantemente le linee guida e gli standard richiesti da Franco e i requisiti delle normative europee. La F.A.N. Europe lighting lancia sul mercato i marchi IN.TEC. E Luce Ambiente Design che racchiudono le esigenze tecnologiche e stilistiche per qualunque ambiente.

On 2010, a period of European economic crisis, production costs became unsustainable for the management of glass production. Furthermore, the shortage of raw materials in our country and a poorly defined sector of research and poor development of emerging technologies in the field of lighting (LED), did force Franco to permanently switch off the ovens.
Thus cooperation with non-European companies did begin and did start the possibility to create both highly technological products and refined designed products, constantly respecting the guidelines and standards required by Franco and the requirements of European norms and regulations. F.A.N. Europe Lighting launched the brands IN.TEC and Luce Ambiente Design on the market that both encompass the technological and stylistic needs for any light environment.

Oggi la FAN Europe lighting si affaccia al futuro: i fratelli Tammaro Letizia, Carmine e Davide si affiancano al padre per gestire rispettivamente amministrazione e rapporti con l'estero, ricerca - sviluppo e logistica , area commerciale e assistenza con un team affiatato di 40 persone. Alla storica sede di Nola con i suoi 15000 metri quadrati coperti su 30000 totali si aggiungerà la nuova sede a Milano studiata per ampliare i rapporti con l'Europa, migliorare ulteriormente la logistica ma sopratutto per un controllo qualità sempre più minuzioso e attento.

Nasce l'app intec, la luce diventa smart con prodotti app e voice control. Nuovi servizi di customizzazione e domotica per adattare in maniera funzionale i prodotti professionali. Luci industriali ad alti lumen e consumi green. Cataloghi in continua evoluzione per tenersi al passo con la tecnologia che avanza e nuovi design.

La tradizione continua, diventa innovativa; un nuovo concetto di luce fatto su misura per tutti gli ambienti e gli stili.

Good Light & Good Style!

Today FAN Europe lighting faces the future: the brothers Tammaro Letizia, Carmine and Davide work alongside their father to manage the administration and foreign relations, research - development and logistics, commercial area and assistance with a close-knit team of 40 people . The new headquarters in Milan, designed to expand relations with Europe, will be added to the historic site in Nola with its 15,000 square meters out of 30,000 in total, improving logistics but above all for increasingly meticulous and careful quality control.

The Intec app is born, the light becomes smart with app products and voice control. New personalization and home automation services for the functional adaptation of professional products. High lumen industrial lights and green consumption. Constantly evolving catalogues to keep up with advancing technology and new designs.

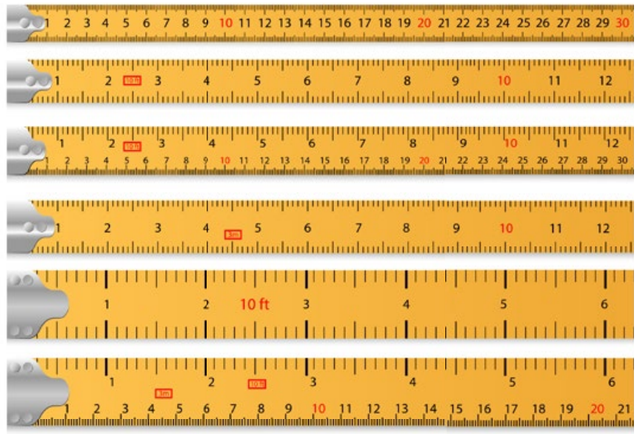

The tradition continues, it becomes innovative; a new concept of light tailored to all environments and styles.

Good Light & Good Style!

Illuminazione su misura

L'evoluzione stilistica e tecnologica dell'illuminazione focalizzata sempre più su un progetto luminoso piuttosto che sull'estetica del corpo illuminante fine a se stesso, ha indirizzato l'evoluzione illuminotecnica sempre più verso progetti di illuminazione realizzati su misura, atti a valorizzare gli ambienti architettonici, rendendo i corpi illuminanti degli strumenti discreti, al servizio del progetto architettonico, ancora protagonisti del design innovativo ma amalgamati al progetto come corpo illuminante e non più come oggetto luminoso.
Questa fase evolutiva ci ha spinto ad ampliare la divisione Project ed Illuminotecnica della nostra azienda, divisione che si dedica ai progetti su misura.
La nostra divisione Project ed Illuminotecnica esegue già servizio di progettazione , realizzazione prototipi, test e controllo produzione durante la fabbricazione di ogni prodotto presente sul nostro catalogo.
Quando i nostri prodotti non incontrano le esigenze del cliente, ci occupiamo della realizzazione di prodotti "customizzati" partendo dalla ricerca dei materiali giusti, del LED più idoneo allo spettro estetico e normativo richiesto, e dell'elettronica di controllo più adeguata. Ogni customizzazione su misura viene curata nei minimi dettagli per essere adeguata alle esigenze specifiche del progetto e per valorizzare al massimo gli ambienti del disegno illuminotecnico, in modo che ogni architettura sia messa in risalto da un efficace dialogo tra estetica e tecnica.
Grazie a strumenti informatici e software di calcolo fotometrico siamo in grado di fornire per ogni nuovo prodotto i calcoli fotometrici per un adeguato sviluppo progettuale illuminotecnico.

The stylistic and technological evolution of lighting focused more and more on a lighting project rather than on the aesthetics of the lighting body itself, has increasingly directed the evolution of lighting technology towards tailor-made lighting projects, aimed at enhancing the environments architectural, turning the lighting bodies in discreet lighting instruments, at the service of the architectural project, still protagonists of the innovative design but amalgamated with the project as a lighting body and no longer as a luminous object.
This evolutionary phase prompted us to expand the Project and Lighting Engineering division of our company, a division dedicated to tailor-made projects.
Our Project and Lighting Engineering division already carries out design, prototype, test and production control services during the manufacture of each product on our catalogue.
When our products do not meet the customer's needs, we take care of the creation of "customized" products starting from the research for the right materials, the most suitable LED for the aesthetic and regulatory spectrum required, and the most suitable control system electronics. Each custom-made customization is taken with the highest care till the smallest detail to be appropriate to the specific needs of the project and to make the best lighting design environments, so that each architecture is highlighted by an effective dialogue between aesthetics and technique.
Thanks to highly professional devices and photometric calculation software we are able to provide photometric calculations for each new product for adequate lighting design development and project calculation.

EASY DOMOTICA

Easy domotica
Easy Home Automation

Con questo segmento tecnico intendiamo soddisfare al meglio la crescente esigenza di migliorare la qualità di vita domestica, e lavorativa attraverso l'utilizzo di dispositivi di illuminazione sempre più interconnessi fra loro tramite collegamenti sempre più semplificati dalle tecnologie wireless.

I dispositivi di illuminazione diventano uno strumento estremamente personalizzato e modulabile che si fondono, anche in diversi momenti della giornata, con le evolute esigenze di illuminazione non più fine a se stessa ma adattata ai diversi umori sia di una utenza professionale che di una utenza domestica o ludica.

Questa sezione raggruppa prodotti a bassa tensione che è possibile collegare con alimentatori a tensione costante in parallelo e si caratterizzano per la estrema flessibilità e modularità essendo essi compatibili con centraline di controllo in Radio Frequenza 2,4G, Infrarossi, Wifi o Buetooth.
Le centraline a loro volta prevedono interfacce wifi, bluetooth oppure possono essere controllate tramite wall pad o radiocomandi.

With this technical segment, we intend meet in the best way the growing need to improve the quality of home and working life through the use of lighting devices that are increasingly interconnected with each other through connections that are increasingly simplified by wireless technologies.

The lighting devices become an extremely personalized and modular tool that merge, even at different times of the day, with the evolved lighting needs no longer as light source itself but light adapted to the different moods of both professional users, domestic users, playful users.

This section groups low voltage products that can be connected with constant voltage power supply in parallel connection system and are characterized by extreme flexibility and modularity as they are compatible with 2.4G Radio Frequency, Infrared, Wifi or Bluetooth control units.
The control units can be controlled by wifi, bluetooth devices or can be controlled via a wall pad or remote control

SMART INTEC
Wi-Fi

App Intec

DOWNLOAD ON
Download on the App Store
GET IT ON Google Play

Good solution for your Smart life!

Ogni momento della vita quotidiana richiede la giusta luce.
Grazie all'illuminazione Smart, creare l'atmosfera ideale per tutti i momenti sarà possibile con i nostri prodotti Wi-fi e Bluetooth.
Tramite la nostra app Smart INTEC è possibile comandare da remoto tutti gli apparecchi luminosi per accendere o spegnere, cambiare temperatura colore Kelvin della luce e anche impostare scene.
Tra i nostri articoli troverai una selezione di prodotti a LED integrato pronti all'installazione ma anche tutti gli accessori necessari per rendere smart qualunque apparecchio domestico e non. Una volta collegata e scaricata l'app INTEC, la creazione delle varie stanze sarà semplice e intuitivo grazie alle istruzioni step by step.
Per controllare i nostri prodotti smart è possibile anche utilizzare gli smart speaker e video Amazon e Google. Abilita la skill e controlla i dispositivi semplicemente parlando.

Powered by tuya Intelligence Inside

Every moment of everyday life require the right light.
Thank to the Smart lighting it will be possible to create the ideal atmosphere connecting them and controlling them thorough Wi-fi or Bluetooth connection.
With our APP Smart Intec it is possible to control from remote all the lighting devices with on-off, kelvin colour temperature changing, light colour and scenes functions.
To instore some smart lamps it is necessary just your standard home electric connection, and wifi connection.
Once connected the lamp and downloaded the APP Smart Intec it will be very easy to create groups and rooms in very easy process thank to the instructions step by step on the App.
The smart lamps can be controlled also with Wifi voice control devices.
